Dexian Successfully Builds Data Loss Prevention Team for Top Fortune 500 Banking Institution

@Dexian, LLC, 2023 | 4320241945

CLIENT:

Global Information Security division within one of the top three Fortune 500 Banking Institutions.

Challenge

The client needed a 6-person team of Data Loss Prevention (DLP) Analysts to protect the business from cyberattacks by maintenance and monitoring thousands of tickets.

Solution

By understanding the culture and skill level needed, Dexian developed the "perfect profile" and reached out to its referral network. The client hired 6 and 8 candidates interviewed, quickly establishing a successful team. Additional resources were added during the course of the project, which was extended the following year.

Outcome

The team continues to provide protection against ongoing cyber threats, including malware, phishing, email scams, and other cybercrimes. The consultants are exceeding client's expectations of closing out over 250 tickets each week. Dexian's knowledge of the client's need has made us a reliable and preferred resource for building teams and delivering consultants who often get project extensions or convert to full-time employees.
