

Case study: Public Sector

## Chameleon SharePoint Migration

**CLIENT:**

Employer of licensed technicians who used advanced technologies to deliver an extensive range of water and wastewater management services

@Dexian, LLC, 2023 | 4258227435

### Challenge

- The client wanted to upgrade its existing SharePoint 2007 environment, including its Chameleon Application, to SharePoint 2013 to stay in compliance with industry regulations and security updates
- The client needed mission-critical content migrated to keep business units running with minimal downtime while maintaining data integrity

### Solution

- Dexian quickly identified no direct upgrade path from SharePoint 2007 to 2013
- Dexian performed a series of database-attach upgrades to upgrade the content to SharePoint 2010 products, then to 2013 – implementing the migration in two phases
- Dexian moved client's Chameleon Application to 64-bit hardware and Windows Server 2008

### Outcome

- Dexian completed migration without significant business interruption
- New SharePoint 2013 runs in Windows Server 2012 R2, providing a stable, dependable, easy-to-manage platform with enhanced scalability and performance
- Additional features and functions of new system allow for enhanced user experience
- Project garnered long-term relationship with client to enhance & expand Chameleon Application
